

THEORY AND APPLICATIONS OF CATEGORIES

Volume 32, 2017

A structure theorem for quasi-Hopf bimodule coalgebras
Daniel Bulacu, 1-30

Simplicial Nerve of an A_∞ -category
Giovanni Faonte, 31-52

C-systems defined by universe categories: presheaves
Vladimir Voevodsky, 53-112

The (Π, λ) -structures on the C-systems defined by universe categories
Vladimir Voevodsky, 113-121

Bourn-normal monomorphisms in regular Mal'tsev categories
Giuseppe Metere, 122-147

Homotopy theory for algebras over polynomial monads
M. A. Batanin and C. Berger, 148-253

A note on injective hulls of posemigroups
Changchun Xia, Shengwei Han, Bin Zhao, 254-257

Witt vectors and truncation posets
Vigleik Angeltveit, 258-285

Classifying tangent structures using Weil algebras
Poon Leung, 286-337

KZ-monadic categories and their logic
Jiri Adamek and Lurdes Sousa, 338-379

Corelations are the prop for extraspecial commutative Frobenius monoids
Brandon Coya and Brendan Fong, 380-395

Monoid-like definitions of cyclic operad

Jovana Obradovic, 396-436

Building a model category out of multiplier ideal sheaves

Seunghun Lee, 437-487

A categorical approach to Picard-Vessiot theory

Andreas Maurischat, 488-525

Epireflective subcategories and formal closure operators

Mathieu Duckerts-Antoine, Marino Gran, and Zurab Janelidze, 526-546

Algebraic databases

Patrick Schultz, David I. Spivak, Christina Vasilakopoulou, and Ryan Wisnesky, 547-619

The two out of three property in ind-categories and a convenient model category of spaces

Ilan Barnea, 620-651

Frobenius algebras and homotopy fixed points of group actions on bicategories

Jan Hesse, Christoph Schweigert, and Alessandro Valentino, 652-681

A presentation of bases for parametrized iterativity

Jiri Adamek, Stefan Milius and Jiri Velebil, 682-718

Closure operators in abelian categories and spectral spaces

Abhishek Banerjee, 719-735

Lax distributive laws for topology, II

Hongliang Lai, Lili Shen and Walter Tholen, 736-768

A property of effectivization and its uses in categorical logic

Vasileios Aravantinos-Sotiropoulos and Panagis Karazeris, 769-779

Levi categories and graphs of groups

Mark V. Lawson and Alistair R. Wallis, 780-802

Metric spaces and SDG

Anders Kock, 803-822

A unifying approach to the acyclic models method and other lifting lemmas

Leonard Guetta, 823-834

Connections in tangent categories

J.R.B. Cockett and G.S.H. Cruttwell, 835-888

Biextensions, bimonoidal functors, multilinear functor calculus, and categorical rings

Ettore Aldrovandi, 889-969

Urysohn type lemma for groupoids

Madalina Roxana Buneci, 970-994

A bicategory of decorated cospans

Kenny Courser, 995-1027

The canonical 2-gerbe of a holomorphic vector bundle

Markus Upmeyer, 1028-1049

Classifiers for monad morphisms and adjunction morphisms

Dimitri Zaganidis, 1050-1097

Free objects over posemigroups in the category \mathbf{PoSgr}_v

Shengwei Han, Changchun Xia, Xiaojuan Gu, 1098-1106

Combinatorics of past-similarity in higher dimensional transition systems

Philippe Gaucher, 1107-1164

A Dold-Kan theorem for simplicial Lie algebras

P. Carrasco and A.M. Cegarra, 1165-1212

Localization of enriched categories and cubical sets

Tyler Lawson, 1213-1221

Coexponentiability and Projectivity: Rigs, Rings, and Quantales

S.B. Niefield and R.J. Wood, 1222-1228

Hopf polyads, Hopf categories and Hopf group monoids viewed as Hopf monads

Gabriella Böhm, 1229-1257

Fibered multiderivators and (co)homological descent

Fritz Hörmann, 1258-1362

Kan's combinatorial spectra and their sheaves revisited

Ruian Chen, Igor Kriz and Ales Pultr, 1363-1396

Operads and phylogenetic trees

John C. Baez and Nina Otter, 1396-1453

Topological properties of non-Archimedean approach spaces

Eva Colebunders and Karen Van Opdenbosch, 1454-1484

Mal'tsev objects, R_1 -spaces and ultrametric spaces

Thomas Weighill, 1485-1500

Action representability via spans and prefibrations

J. R. A. Gray, 1501-1521

Approximate categorical structures

Abdelkrim Aliouche and Carlos Simpson, 1522-1562

Stability properties characterising n-permutable categories

Pierre-Alain Jacqmin, Diana Rodelo, 1563-1587

A characterization of the Huq commutator

Vaino Tuhafeni Shaumbwa, 1588-1600

THEORY AND APPLICATIONS OF CATEGORIES (ISSN 1201-561X) will disseminate articles that significantly advance the study of categorical algebra or methods, or that make significant new contributions to mathematical science using categorical methods. The scope of the journal includes: all areas of pure category theory, including higher dimensional categories; applications of category theory to algebra, geometry and topology and other areas of mathematics; applications of category theory to computer science, physics and other mathematical sciences; contributions to scientific knowledge that make use of categorical methods.

Articles appearing in the journal have been carefully and critically refereed under the responsibility of members of the Editorial Board. Only papers judged to be both significant and excellent are accepted for publication.

Full text of the journal is freely available in .dvi, Postscript and PDF from the journal's server at <http://www.tac.mta.ca/tac/> and by ftp. It is archived electronically and in printed paper format.

SUBSCRIPTION INFORMATION. Individual subscribers receive by e-mail abstracts of articles by e-mail as they are published. To subscribe, send e-mail to tac@mta.ca including a full name and postal address. For institutional subscription, send enquiries to the Managing Editor.

INFORMATION FOR AUTHORS. The typesetting language of the journal is \TeX , and $\text{\LaTeX} 2_{\epsilon}$ is strongly encouraged. Articles should be submitted by e-mail directly to a Transmitting Editor. Please obtain detailed information on submission format and style files from <http://www.tac.mta.ca/tac/>.

Managing editor. Robert Rosebrugh, Mount Allison University: rrosebrugh@mta.ca

\TeX nical editor. Michael Barr, McGill University: barr@math.mcgill.ca

Assistant \TeX editor. Gavin Seal, Ecole Polytechnique Fédérale de Lausanne: gavin_seal@fastmail.fm

Transmitting editors.
